The Technische Universität Berlin sees itself as an internationally renowned university in the German capital, in the centre of Europe. Research and teaching are characterized by a wide scope of complementary disciplines. They range from engineering and natural sciences to planning, social sciences and economics as well as humanities. As a strong research university the TU Berlin promotes cooperative activities between the scientific world and industry. It is also one of the most important think tanks in the region and a pillar of the innovation and technology policy of Berlin. With the successful raising of third-party funds it creates hundreds of innovative jobs. With its multitude of worldwide cooperation agreements and a particularly high percentage of foreign students the university has a distinct international character. Students from 130 countries choose the TU Berlin as their place of study.
